

1. General Information

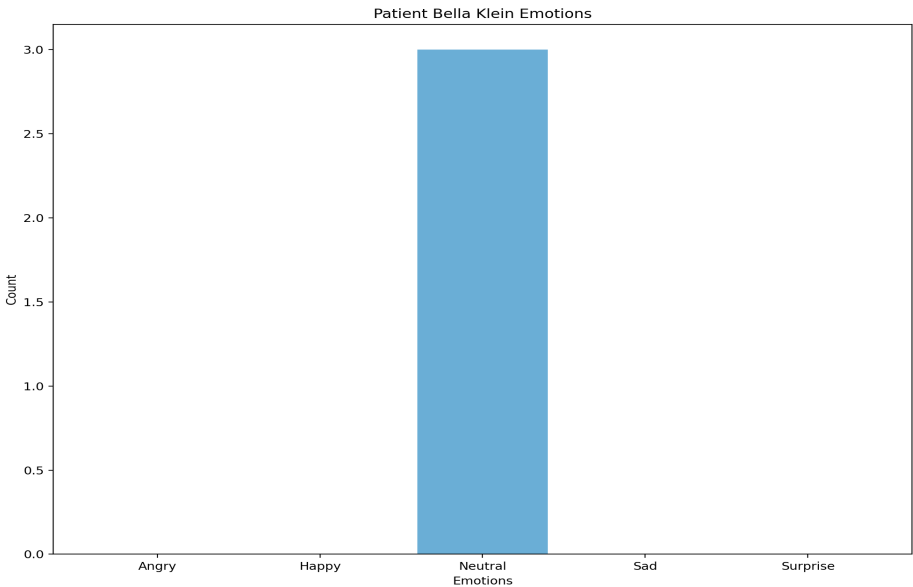

Patient Name	Bella Klein
Date & Time	2025-05-04 18:25
Doctor's Name	Dr. Smith
Visit Type	Routine Checkup

2. Subjective

Emotion Distribution (%)

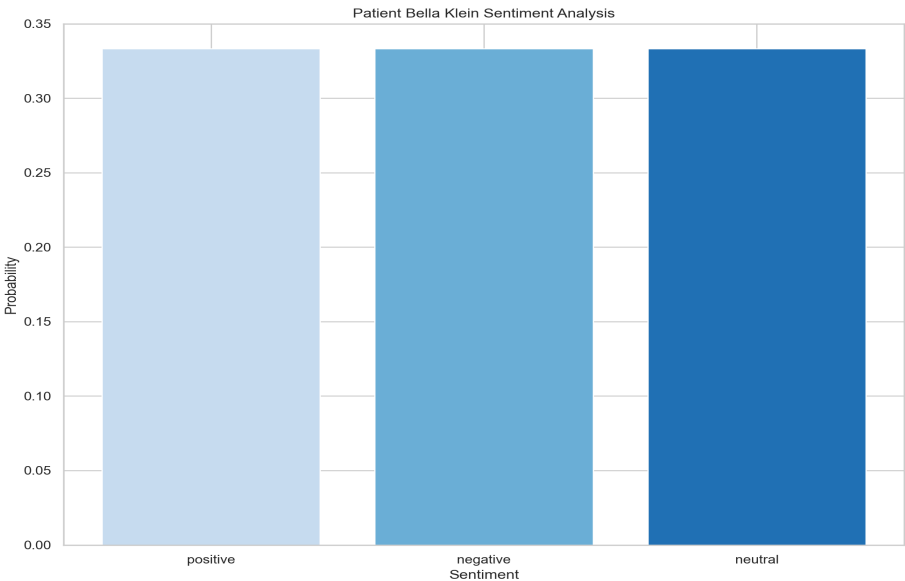

Emotion	%
Angry	0%
Happy	0%
Neutral	100%
Sad	0%
Surprise	0%

Emotion Analysis Output

Emotion Analysis Conclusion: No significant change detected from previous visit.

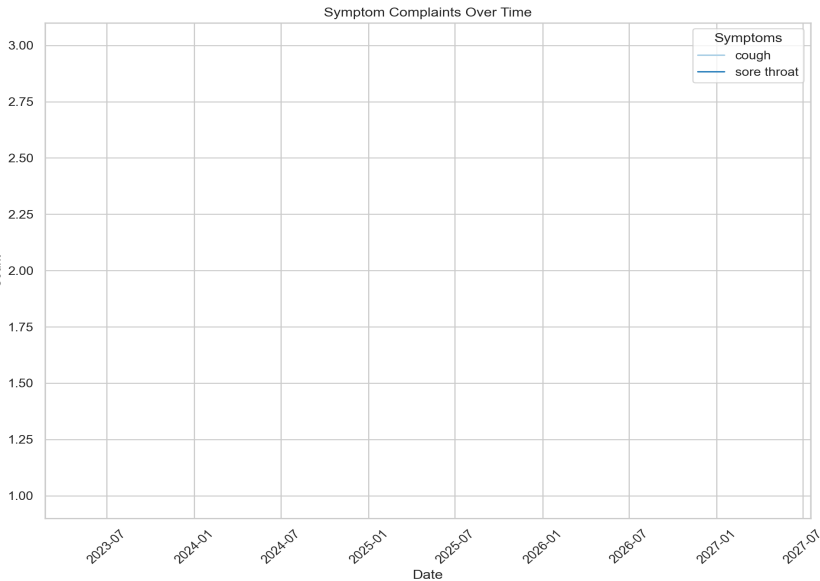

Sentiment Analysis Output

Sentiment Analysis Conclusion: first sentiment analysis results show neutral sentiment overall

3. Objective

Frequency Analysis Output

Symptom	Count
cough	3
sore throat	1

Facial Mapping Analysis Output

Significant change detected

Gait Analysis

Motion Analysis Conclusion: no motion analysis was recorded

4. Assessment Summary

Summary: The patient exhibits a frequent cough and a sore throat, with symptoms reported relatively neutrally and no strong emotional responses. The absence of positive emotions and a continuous symptom presence suggest that the patient's condition is not currently improving.

Conclusion

Conclusion: The patient is likely experiencing an ongoing illness related to their respiratory health, but not in an immediate state of decline or severe concern.

Suggested Diagnosis

Diagnosis: The combination of a persistent cough and a sore throat may indicate a possible upper respiratory infection or irritation. Further evaluation is needed to determine any underlying infections or complications.

Recommendations for the Doctor

Recommendations:

1. Recommend the patient to increase fluid intake and consider a throat lozenge or saline gargle for relief.
2. Suggest rest and monitoring of symptoms for any escalation, particularly if fever or difficulty breathing develops.
3. Consider scheduling a follow-up appointment to reassess symptoms and possibly perform further tests, such as a throat swab for infectious agents.
