

1. General Information

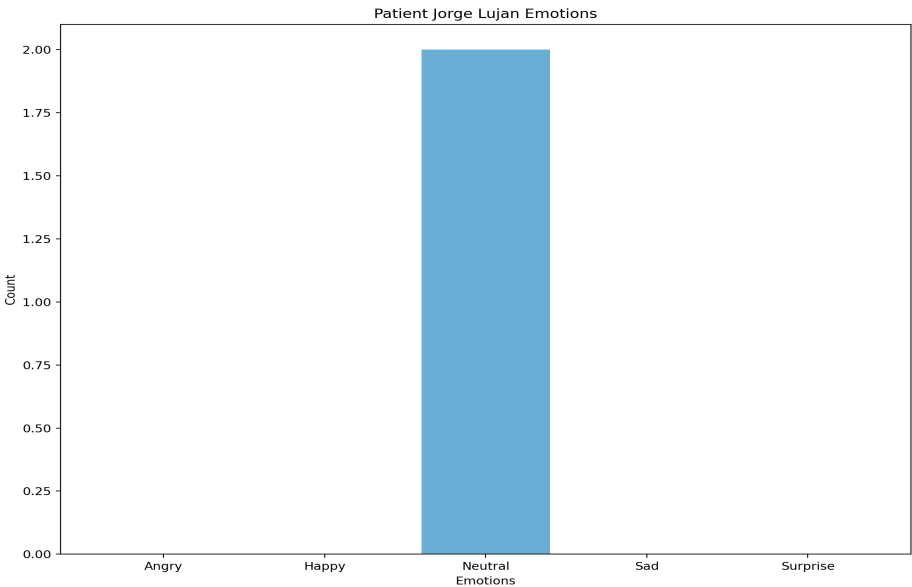

Patient Name	Jorge Lujan
Date & Time	2025-05-04 18:13
Doctor's Name	Dr. Smith
Visit Type	Routine Checkup

2. Subjective

Emotion Distribution (%)

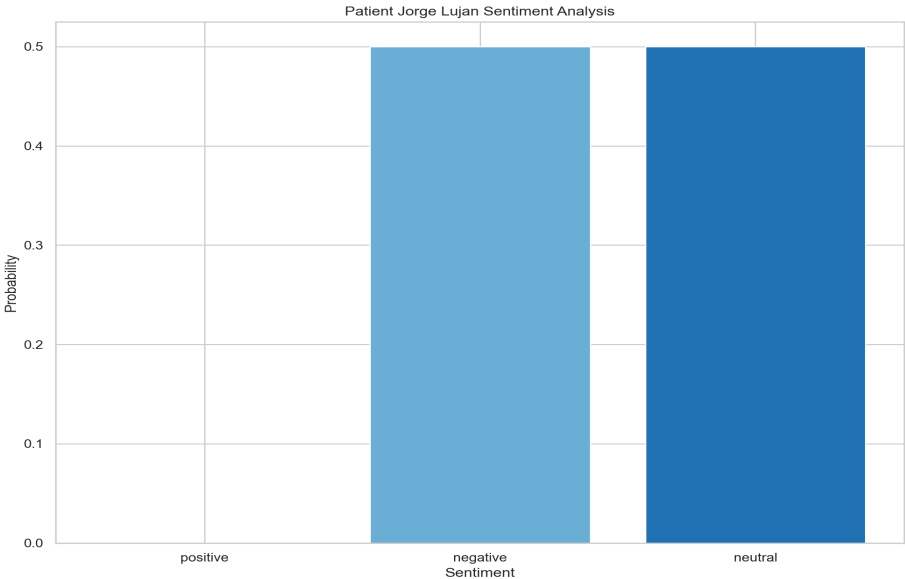

Emotion	%
Angry	0%
Happy	0%
Neutral	100%
Sad	0%
Surprise	0%

Emotion Analysis Output

Emotion Analysis Conclusion: No significant change detected from previous visit.

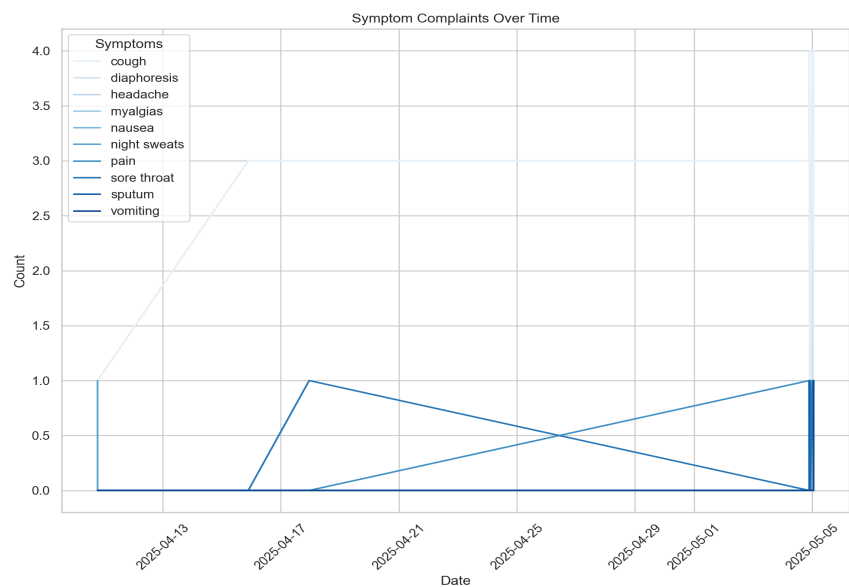

Sentiment Analysis Output

Sentiment Analysis Conclusion: sentiment analysis shows negative change

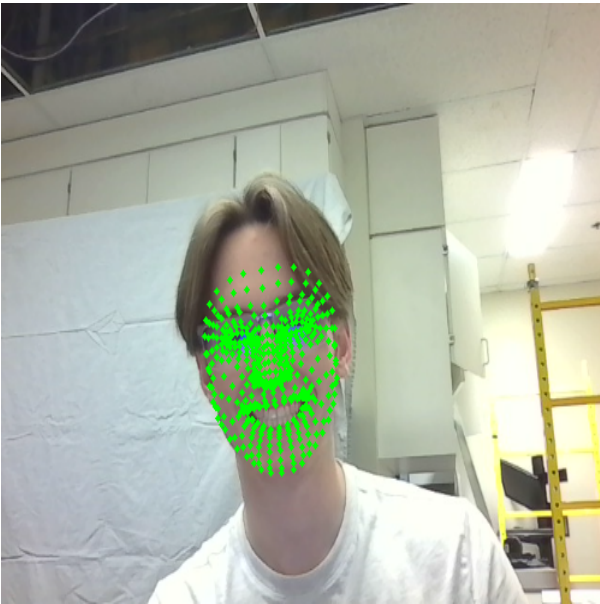

### 3. Objective

#### Frequency Analysis Output

Symptom	Count
vomiting	1

#### Facial Mapping Analysis Output

Significant change detected

#### Gait Analysis

Motion Analysis Conclusion: no motion analysis was recorded

### 4. Assessment Summary

Summary: The patient reports a symptom of vomiting, which occurred once, and has a neutral emotional state with no apparent feelings of happiness or sadness. This suggests a lack of significant distress but does indicate a potentially concerning physical condition.

## Conclusion

Conclusion: The patient's health appears to be not healthy due to the reported vomiting, which may suggest an underlying issue that needs further investigation.

## Suggested Diagnosis

Diagnosis: The presence of vomiting may indicate gastrointestinal disturbances or infections, which may require further evaluation to rule out more serious conditions.

## Recommendations for the Doctor

Recommendations:

1. Conduct a thorough physical examination and history to determine potential causes of the vomiting.
2. Consider ordering laboratory tests (such as blood work or imaging) to assess the gastrointestinal system and rule out any infections or obstructions.
3. Advise the patient to maintain hydration and monitor any additional symptoms that may arise while arranging a follow-up appointment.
