

1. General Information

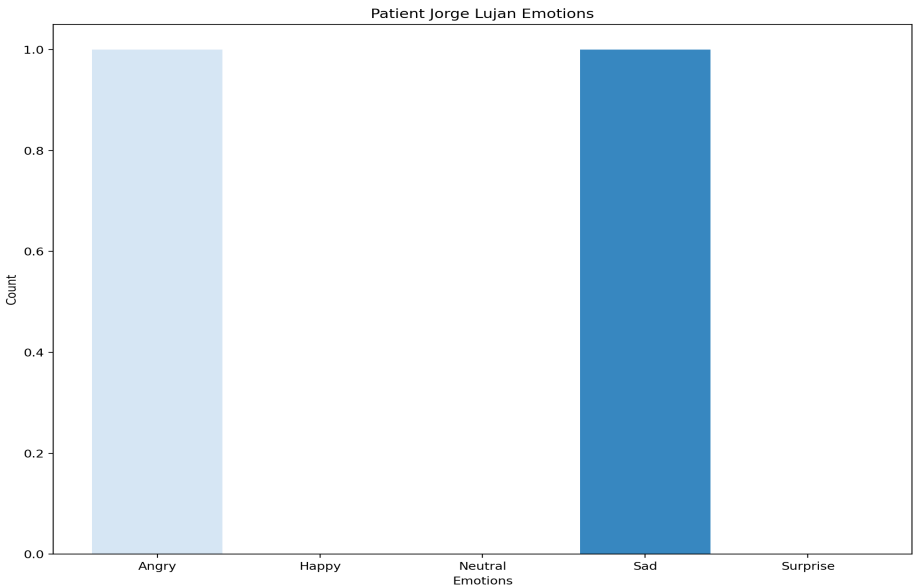

Patient Name	Jorge Lujan
Date & Time	2025-05-04 17:41
Doctor's Name	Dr. Smith
Visit Type	Routine Checkup

2. Subjective

Emotion Distribution (%)

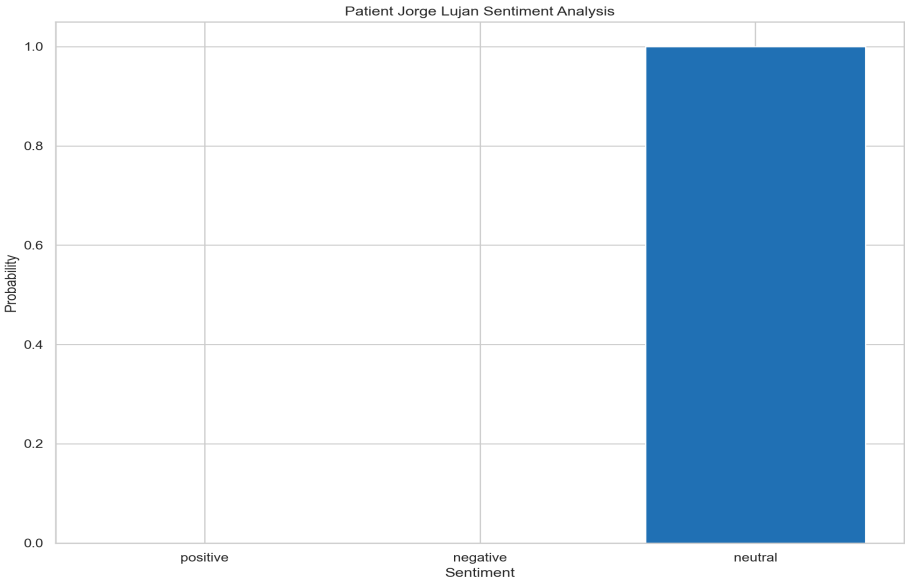

Emotion	%
Angry	50%
Happy	0%
Neutral	0%
Sad	50%
Surprise	0%

Emotion Analysis Output

Emotion Analysis Conclusion: No significant change detected from previous visit.

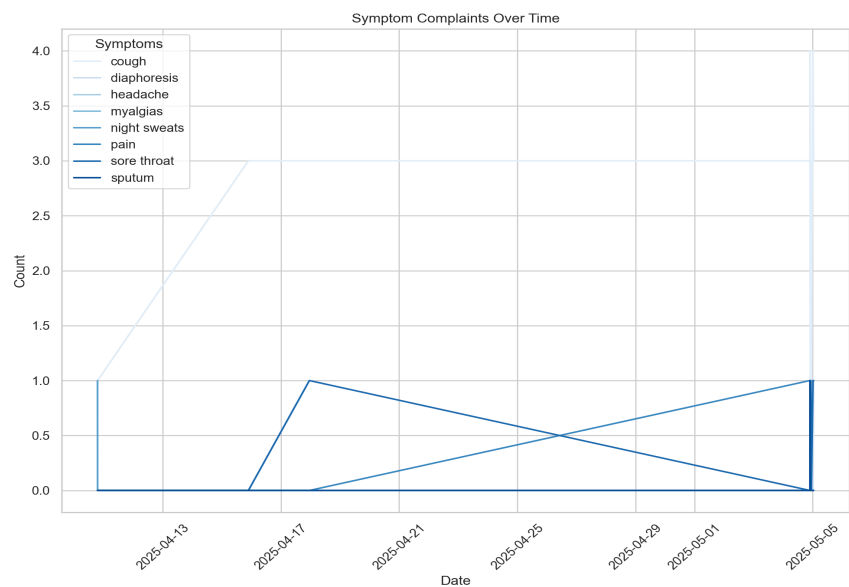

Sentiment Analysis Output

Sentiment Analysis Conclusion: sentiment analysis shows no change

### 3. Objective

#### Frequency Analysis Output

Symptom	Count
cough	3
sore throat	1
diaphoresis	1

#### Facial Mapping Analysis Output

No facial mapping analysis was recorded

#### Gait Analysis

Motion Analysis Conclusion: Gait appears normal.

### 4. Assessment Summary

Summary: The patient is exhibiting symptoms such as a cough and sore throat, alongside emotional indicators of sadness and anger. This combination suggests that the patient may not be healthy and is experiencing discomfort.

## Conclusion

Conclusion: The patient appears to be declining in health, showing symptoms that may indicate an underlying respiratory infection or illness.

## Suggested Diagnosis

Diagnosis: The symptoms of cough, sore throat, and diaphoresis coupled with the emotional responses indicate a potential upper respiratory infection, possibly accompanied by viral or bacterial causes. Close monitoring and further evaluation may be necessary to rule out more serious conditions.

## Recommendations for the Doctor

Recommendations:

3. Schedule a follow-up appointment to reassess symptoms and make further recommendations based on the patient's progress.
