

1. General Information

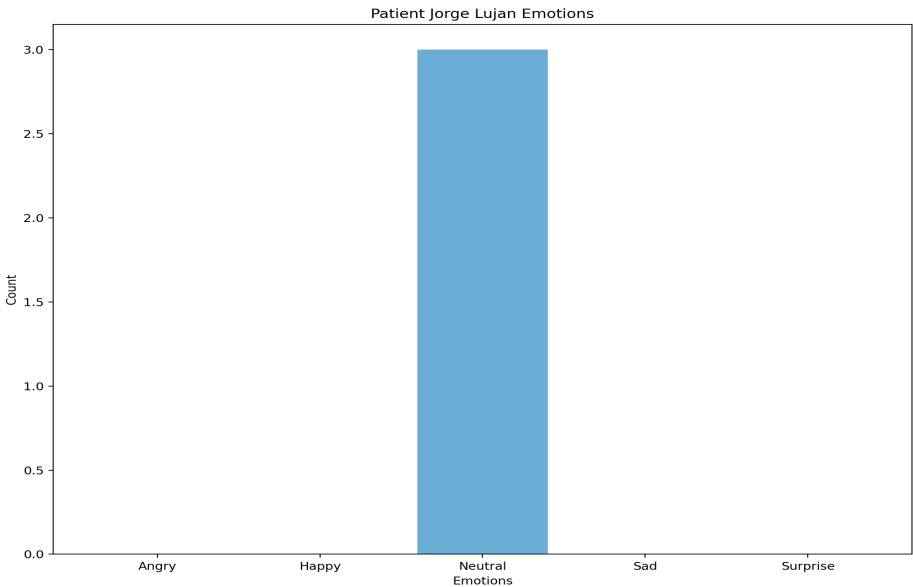

Patient Name	Jorge Lujan
Date & Time	2025-05-04 17:56
Doctor's Name	Dr. Smith
Visit Type	Routine Checkup

2. Subjective

Emotion Distribution (%)

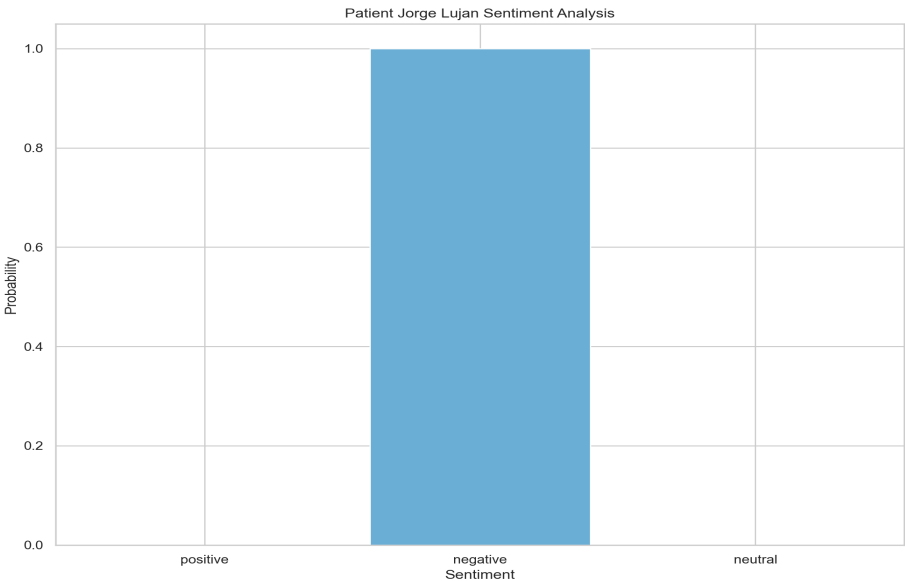

Emotion	%
Angry	0%
Happy	0%
Neutral	100%
Sad	0%
Surprise	0%

Emotion Analysis Output

Emotion Analysis Conclusion: No significant change detected from previous visit.

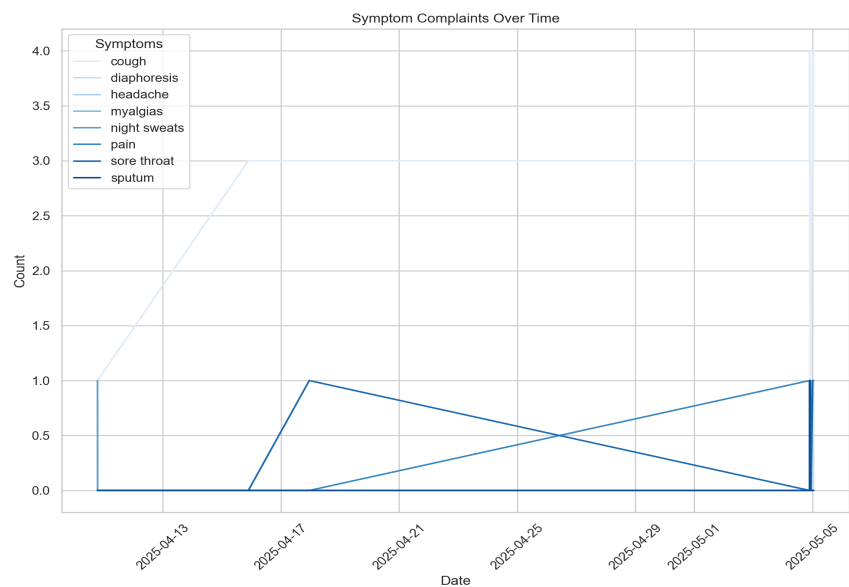

Sentiment Analysis Output

Sentiment Analysis Conclusion: sentiment analysis shows negative change

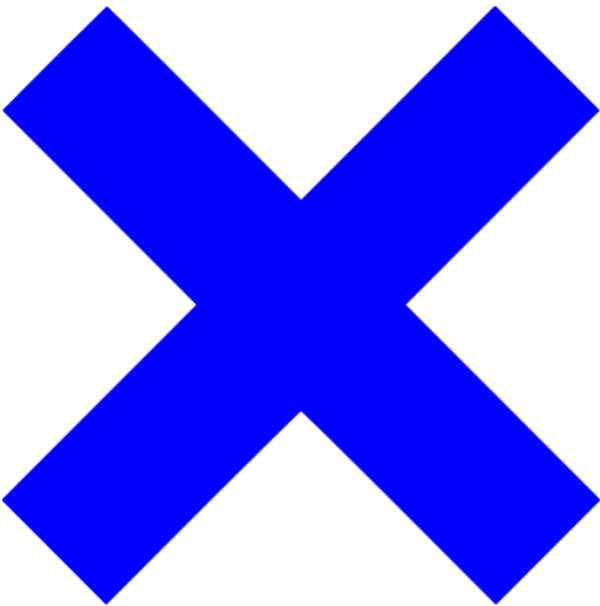

3. Objective

Frequency Analysis Output

Symptom	Count
cough	4
sore throat	1

Facial Mapping Analysis Output

No facial mapping analysis was recorded

Gait Analysis

Motion Analysis Conclusion: Gait appears normal.

4. Assessment Summary

Summary: The patient is experiencing a mild cough and sore throat, with reported symptoms being neutral in sentiment and lacking any strong emotional response. Overall, the absence of significant emotional distress and the limited number of symptoms suggest that the patient's condition is not currently severe.

Conclusion

Conclusion: The patient is not healthy but appears to be stable, with no indications of serious health deterioration at this time.

Suggested Diagnosis

Diagnosis: Nothing is wrong with the patient that suggests a serious health risk; the symptoms reported are likely indicative of a mild respiratory infection or irritation.

Recommendations for the Doctor

Recommendations:

1. Encourage the patient to stay hydrated and rest to aid recovery.
2. Consider recommending over-the-counter medications to alleviate cough and sore throat symptoms if necessary.
3. Advise a follow-up appointment if symptoms persist or worsen over the next few days.
